

Performance Testing

Date	30 June 2026
Team ID	XXXXXXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how the system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	VS Code, Streamlit
Type of Testing	Load Testing, Stress Testing
Target Module / API	/predict API Endpoint
Test Environment	Local Flask Server (localhost:5000)
Test Date	27 June 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Predict credit card approval for a valid applicant	10	60	Prediction generated successfully
2	Multiple users submitting applications simultaneously	20	60	System handles concurrent requests without failure
3	Continuous prediction requests to the /predict endpoint	30	120	Response time remains acceptable
4	High-volume prediction requests under peak load	50	180	API remains stable with minimal errors

Step 4: Observations & Analysis

- The /predict API successfully handled concurrent prediction requests without significant performance degradation.
- Average response time remained below the target threshold throughout testing.
- The Random Forest prediction model generated results quickly, even during peak workloads.
- No major application crashes or unexpected failures were observed during testing.
- CPU and memory utilization remained within safe operational limits.
- Overall, the system demonstrated stable, reliable, and efficient performance under both normal and peak load conditions.

Step 5: Screenshots / Evidence

A screenshot of the 'Credit Card Approval Prediction' web application showing the input form. The form is a white card with the title 'Credit Card Approval Prediction'. It contains several input fields with labels: 'CNT_CHILDREN' (value: 1), 'AMT_INCOME_TOTAL' (value: 250000), 'CNT_FAM_MEMBERS' (value: 3), 'AGE' (value: 32), and 'YEARS_EMPLOYED' (value: 7). Below the input fields is a blue button labeled 'Predict'. At the bottom of the card, there is a green checkmark icon followed by the text 'Credit Card Approved'.
